

Bridgerland Apartments Wireless Internet Instructions

To set up wireless internet complete the following steps:

1. Open up My Network Places
2. Window labeled as “1” should display. Open up Wireless Network Setup Wizard
3. Window “2” should display. Enter Network Name (apt followed by apartment # for example if I were in apartment 26 I would enter apt26)
4. Click “Manually assign a network key” then click next.
5. The next screen will ask for the network key. This is the 10 number key listed on the side of the modem.
6. Follow the rest of the steps in the setup wizard.

Note: these networks are “non-broadcasting” and will not show up on your available wireless list until they have been setup.
